PROGRAMME

- Easy to use networking scanning solution for emailing, faxing and filing paper documents
- Small footprint makes it easy to install in a variety of locations
- Large touch screen display enables easy data entry and image viewing
- Robust 50-page Automatic Document Feeder (ADF) even allows for batch scanning
- Built-in keyboard for complete capture routine support

fi-6000NS Specifications

Turn-key network scanning solution with a small footprint and high performance

The Fujitsu fi-6000NS Network Scanner is the first scanner that combines the intuitive, easy installation of a desktop scanner with the productivity of a network scanner. It is an easy to use scanning solution for sharing documents in today's multi-location, global environment.

Network scanning, collaboration, emailing and faxing just got a lot easier. Simply load your documents, log into the network, select the destination, and press the scan button.

The fi-6000NS scans in colour or monochrome at duplex speeds up to 50 ipm. With a 600 dpi optical resolution, image quality is among the best in its class.

Not only does the network scanner offer ultrasonic double feed detection and long document scanning support (up to 863 mm), it also features hard card scanning capabilities (ISO7810 standard) and embossed card scanning through the main automatic

document feeder (ADF). With its very compact footprint the fi-6000NS installs easily into even the most crowded environments, including front office and back office locations. Its compact size isn't the only reason the fi-6000NS saves space. Because it can scan to a network fax system, scan to email, scan to PDF (searchable) and scan to shared network folders, it also saves space – and money – by eliminating printers, fax machines, and copiers that are no longer needed.

Featuring a large touch-screen display and a built-in keyboard, the Fujitsu fi-6000NS offers the same input capabilities as a computer. Need to email a document? Scan it, enter the email address and touch the send email icon. Need to share a document? Just scan it to a PDF and send it to the office next door, or to an office around the world.

Increase productivity and decrease costs. The fi-6000NS scanner does it all.

Model		fi-6000NS
Technology		Dual Colour Charge coupled device (CCD) image sensors, 80 Gb SATA 3.5 in HDD
Resolution		Optical: 600 dpi / Output: 150, 200, 300, 600 dpi
Halftone patterns		Dither and error diffusion automatic
Colour		24-bit single pass colour, auto colour detection
Scanning speed		Simplex: 25 ppm (200 dpi), Duplex: 50 ipm (200 dpi)
Scanning mode		Simplex and Duplex
Document feeding mode		Automatic document feeder (ADF)
ADF capacity		50 Sheets (A4: 80 g/m ²)
Document size		ADF minimum
		(A8) (53 mm x 74 mm)
Network protocols		ADF maximum
		(Legal) (216 mm x 356 mm)
Network server		TCPIP DHCP, SMTP, SMB, LDAP and SNMP
Output methods		Windows 2000 or 2003 Server required
Interface		TIFF, MTIFF, JPEG, PDF, searchable PDF's (English)
Software driver support		One network connection RJ45 10/100 base T
JPEG compression		All software loaded on system (embedded)
Power requirements		Hardware; choose from 7 different levels
Power consumption		100 – 240 VAC, 50 / 60 Hz
Operating environment		Scanner
		28-34 W, Energy saving mode: 6 W or less
Relative humidity		Computer
		88 W or less, Energy saving mode: 10 W or less
Temperature		42° to 95° F (5° to 35° C)
Dimensions (W x D x H)		20% to 80% (non-condensing)
Weight		315 x 415 x 281 mm
Automatic image processing		13 KG
Security		Auto deskew, auto orientation, auto page size detection and blank page detection
Touch panel		Password protected (PDFs), login authentication (LDAP)
Type		Screen size
		213 mm XGA (1024 x 768 pixel) TFT colour monitor
		Analog resistive touch display
